Country Heart Attack Prevention (CHAP) Project

Heart Health for Life

'Heart Health for Life' Cardiac Rehabilitation Led by Rural GPs

Presenter: Danny Haydon – Brentnalls Health
On behalf of the CHAP Project

Aim of the CHAP Project

Translate evidence and guidelines to increase attendance and completion of Cardiac Rehabilitation for patients living in rural and remote SA

CHAP – Country Heart Attack Prevention

CATCH - Country Access To Cardiac Health

ICCnet SA – Integrated Cardiovascular Clinical Network SA

Partners

The CHAP project is co-funded by NHMRC Partnership Grant (GNT 1169893)

CR in Rural and Remote GP Practices

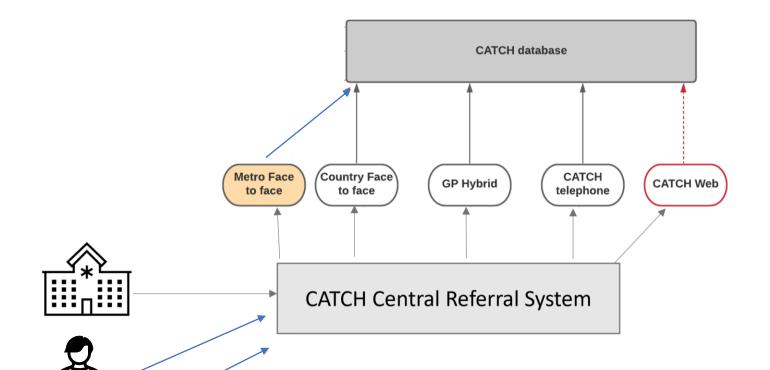

Key messages for the rural GP community

- Shifting Cardiac Rehabilitation from a metro tertiary setting to an accessible rural based model
- Reinforce the GP as the centre of the patients coordination of care & assessment
- Engage clinicians, including GPs, to ensure all patients are participating in Cardiac Rehabilitation program

CR in Rural and Remote GP Practices

Initial / Pre-Assessment 1

1-2 weeks post discharge

75 min consult – 60 min Practice Nurse / 15 min GP

Preparation of GP Management Plan

Business Case

- The business case is based on utilising the Chronic Disease Care Planning MBS items that are well
- known to GPs and adapting the process to incorporate CR within the GP context.
- The goal is to achieve all four objectives of the Quadruple Aim:

Improved patient experience of care

- · Care tailored to the needs of an individual
- · Coordinated and comprehensive care
- · Safe and effective care
- Timely and equitable access
- . Increased skills and confidence to manage one's own care

Improved health outcomes & populations management

- · Reduced disease burden
- · Increased focus on prevention
- · Improved quality of care
- · Improvement in individual behavioural and physical health

Improved cost efficiency and sustainability in healthcare

- · More efficient and effective service delivery
- · Increased resourcing to primary care
- . Improved access to primary care, reducing demand on hospitals

Improved health care provider experience

- · Increased clinician and staff satisfaction
- · Increased flexibility and scope for innovation
- · Evidence of leadership and team-based approach
- Quality improvement culture in practice

CR in Rural and Remote GP Practices

Heart Health for Life

What we discovered and are excited about

- A business case that has the ability to deliver viable and sustainable CR in rural & remote GP practices with the GP at the centre of patient care
- A service delivery model of CR care that will help to reduce secondary cardiac events for patients is Country SA.
- An IT / Telehealth Framework that will assist in delivering
 - Important data collection and sharing between GP practice & iCCnet
 - User friendly software interface for data entry by patient and practice nurse
 - Allied health services to Country SA patients
- Language shift from Chronic Disease to Heart Health for Life

Heart Health for Life

The value proposition will achieve the following:

- Business model for "Heart Health for Life"
- Many item numbers are currently underutilised
- Long term GP/Patient relationships
- Focus on positive "wellness" and "prevention"

Where to from here?

 Recruit resources to facilitate the engagement with GPs, implementation & evaluation.

- Speak to the team who will be at the stand today and grab a flyer
- Download full Business Model from www.CHAPproject.com.au
- Contact the team via email CHAPproject@flinders.edu.au

'Heart Health for Life' **Cardiac Rehabilitation Led by Rural GPs**

Country Heart Attack Prevention (CHAP) Project, co-funded by NHMRC Partnership Grant (GNT 1169893)

CARDIAC REHAB IN REGIONAL SA

Figure 1: Modes of delivery for cardiac rehabilitatio

WHAT IS THE PROBLEM?

- · Cardiac Rehabilitation (CR) should be life long and requires long-term support,
- Clinical assessments are key to the success of CR across all modes of delivery, however for the rural and remote populations there are additional challenges.
- providing face to face services through to completion, or telehealth-based services pre-CR and at 0, 6 months and 12 months post-completion,
- access to specialist care and patient adherence.

THE SOLUTION

'Heart Health for Life'

- · Sustainable CR in rural and remote GP practices with the GP at the centre of patient care.
- A model of CR care that will help to reduce secondary cardiac events for patients is Country SA,

Chronic Disease to 'Heart Health for Life'.

The full Business Case Report prepared by Brentnalls Health can be downloaded using the QR code, via the CHAP website or email us at the address below to receive a pdf copy.

THE BUSINESS CASE

What services can GPs provide?

- · Utilise the Chronic Disease Care Planning MBS items to adapt the process to incorporate CR within GP context,
- Achieve all four objectives of the Ouadruple Aim:

- Care tailored to the needs of an individua
- . Coordinated and comprehensive care Safe and effective care
- . Timely and equitable access
- Increased skills and confidence to manage one's own care

- Improved health outcomes & populations managemen
- Reduced disease burden
- . Increased focus on prevention · Improved quality of care
- . Improvement in individual behavioural and physical health

- Increased resourcing to primary care
 Improved access to primary care, reducing demand on hospitals
- Improved health care provider experience . Increased clinician and staff satisfaction
 - . Increased flexibility and scope for innovation Evidence of leadership and team-based approach Quality improvement culture in practice
